### 1. CAPITAL ASSESSMENT AND ADEQUACY

### **Scope of Applications**

The State Bank of Pakistan (SBP) through its BPRD Circular No 6 dated 15 August 2013 has issued Basel III Capital instructions for Banks / DFIs. The revision to the previously applicable Capital Adequacy regulations pertain to components of eligible capital and related deductions. The amendments have been introduced with an aim to further strengthen the existing capital related rules. Basel III instructions have become effective from 31 December 2013 with full implementation by 31 December 2019. This Capital Adequacy framework is applicable to the Group.

The Group's capital adequacy is reported using the rules and ratios provided by the State Bank of Pakistan. The capital adequacy ratio is a measure of the amount of a Group's capital expressed as a percentage of its risk weighted assets (RWAs). Banking operations are categorized as either Trading Book or Banking Book and RWAs are determined according to specific treatments as per the requirement of SBP that measure the varying levels of risk attached to on balance sheet and off-balance sheet exposures. Under the current capital adequacy regulations, credit risk and market risk exposures are measured using the Standardized Approach and operational risk is measured using the Basic Indicator Approach. Credit risk mitigants are also applied against the Group's exposures based on eligible collateral.

#### **Capital Management**

The objective of managing capital is to safeguard the Group's ability to continue as a going concern. It is the policy of the Group to maintain a strong capital base so as to maintain investor, depositor and market confidence and to sustain future development of the business. The Group aims to maintain an optimum level of capital along with maximizing shareholders' return.

### Statutory minimum capital requirement and Capital Adequacy Ratio

The SBP through its BSD Circular No. 07 dated 15 April 2009 has prescribed the minimum paid-up capital (net of accumulated losses) for Banks to be raised to Rs.10 billion by the year ending 31 December 2013. The paid-up capital of the holding company for the year ended 31 December 2019 stood at Rs. 10,478 million (2018: Rs. 10,478 million) and is in compliance with SBP requirements.

Banks are also required to maintain a minimum Capital Adequacy Ratio (CAR) of 12.50% of the risk weighted exposures of the Bank. Further, under Basel III instructions, Banks are also required to maintain a Common Equity Tier 1 (CET 1) ratio and Tier 1 ratio of 6.00% and 7.50%, respectively, as at 31 December 2019. As at 31 December 2019 the Group was fully compliant with prescribed ratios as the Group's CAR was 14.65% whereas CET 1 and Tier 1 ratios stood at 14.04 and 14.08% respectively. The Group and its individually regulated operations have complied with all capital requirements throughout the year.

Tier 1 capital comprises of Common Equity Tier 1 (CET 1) and Additional Tier 1 (AT 1) capital.

CET 1 capital includes fully paid-up capital, balance in share premium account, general reserves as per the financial statements, net un-appropriated profits meeting the eligibility criteria.

AT 1 capital includes instruments meeting the prescribed SBP criteria e.g. perpetual non-cumulative preference shares.

The deductions from Tier 1 capital include mainly;

- i) Book value of goodwill / intangibles;
- ii) Deficit on revaluation of available for sale investments;
- iii) Reciprocal cross holdings in equity capital instruments of other banks, financial institutions and insurance companies;
- iv) Investment in mutual funds above a prescribed ceiling; and
- v) Threshold deductions applicable from 2014 on deferred tax assets and certain investments.

Tier 2 capital includes general provisions for loan losses, surplus on the revaluation of assets - net of tax, foreign exchange translation reserves and subordinated debts (meeting the revised eligibility criteria).

#### 1.6 Credit risk - General disclosures

The Group uses the 'Standardised Approach' in calculation of credit risk and capital requirements.

The Group uses reputable and SBP approved rating agencies for deriving risk weight to specific credit exposures. These are applied consistently across the Group credit portfolio for both on - balance sheet and off - balance sheet exposures. The methodology applied for using External Credit Assessment Institutions (ECAI's) inclusive of the alignment of alpha numerical scale of each agency used with risk bucket is as per SBP guidelines as is given below:

	2019					
Exposures	JCR - VIS	PACRA	S & P	Fitch	Moody's

The forms of collateral that are deemed eligible under the 'Simple Approach' to credit risk mitigation as per SBP guidelines are used by the Group and primarily includes cash, government and rated debt securities.

The Group applies SBP specified haircut to collateral for credit risk mitigation. Collateral management is embedded in the Group's risk taking and risk management policy and procedures. A standard credit granting procedure exists which has been well-disseminated down the line, ensuring proper pre-sanction evaluation, adequacy of security, pre-examination of charge / control documents and monitoring of each exposure on an ongoing basis.

Collateral information is recorded diligently in the Bank's main processing systems by type of collateral, amount of collateral against relevant credit exposures. A cohesive accounting / risk management system facilitates effective collateral management for Basel II reporting.

# 2. LEVERAGE RATIO

The Basel III leverage ratio is defined as the capital measure (the numerator) divided by the exposure measure (the denominator), with this ratio expressed as a percentage. As at 31 December 2019 the Bank's Leverage ratio stood at 4.08% (2018: 4.20%) which is well above the minimum requirement of 3.0%.
